- **BILINGUAL DISPLAY**

ChemMaster™

Laundry by  US Chemical

LESS SERVICE = BETTER RESULTS

By design, ChemMaster™ uses digital technology for dependable, highly accurate and consistent dispensing. Additionally, it is a powerful tool that provides technicians and end users with critical information to maximize results. This winning combination, less service and better results, significantly lowers the cost of service and greatly increases your value to the customer.

FEATURES:

- Safety pump lockout feature prevents incompatible products, such as bleach and sour, from ever pumping together
- Bilingual display in either English, Spanish, or both
- “Out of product” alert capability, using standpipe float switches
- Easy-to-read, back-lit display on new control head
- Pump prime capability can be deactivated if appropriate

INSTALLATION:

- Convenient telephone style plug-in connectors
- Easy-mount control head and isolation module
- Upgrade previous ChemMaster™ systems with the new ChemMaster™ Retro Kit
- Isolation Module includes resistor circuit option to filter false or stray voltage signals

PROGRAMMING:

- Simple and intuitive programming with 32-formula capacity
- 28 preloaded formula names, in both English and Spanish
- Enter additional formula names easily as needed
- Battery operation allows off-site programming
- Memory holds during power interruption
- Password protected software
- Formulas can be transferred via computer or laptop, from one control head to another
- Easy pump calibration

DATA:

- Downloading capability, using interface cable with a laptop
- Create, save and print customer reports for each account
