

**WHAT GOOD IS A CLEANING SYSTEM
IF IT DOESN'T FIT YOUR NEEDS?**

WHETHER YOUR CLEANING PROBLEM IS LARGE OR SMALL, YOUR SOLUTION SHOULD BE A PERFECT FIT.

INTRODUCING MixMATE™ Mini SANITATION SYSTEM.

MixMATE Mini concentrates give you maximum cleaning power for a remarkably low cost. The cost savings you'll enjoy extends beyond simple dollars and cents, to time savings and performance as well. It doesn't matter how much value the solutions themselves offer if the dispensing system takes up too much space, is inconvenient to use, or doesn't match your needs.

SAFETY AND VERSATILITY IN AN AUTOMATIC DISPENSING SYSTEM.

One of the benefits of using an automatic dispensing system is that it minimizes direct employee contact with the concentrates. Components of the dispensing unit fit together to accommodate all the cleaning concentrates, or only the MixMATE Mini products you need. MixMATE Mini's patented "spill proof" container can only be dispensed through our unique docking station, ensuring employees never need to come in contact with the solutions themselves.

ENVIRONMENTALLY-SOUND PACKAGING WITH A PURPOSE.

MixMATE Mini solutions are so highly concentrated, you're helping the environment by not generating unnecessary packaging to hold inert ingredients. Plus, the 3100 mL container of MixMATE Mini concentrate is made of a plastic that can be recycled by city recycling programs. The bright, color coded labeling system is not without its purpose either. Bold, easy-to-understand graphics and lettering make product usage practically mistake-proof, eliminating waste and ensuring employee safety.

PREMIUM FORMULAS FOR POWERFUL SAVINGS.

MixMATE Mini formulas offer extremely high concentrations of active ingredients, giving you a low, low use cost every time you dilute. With the push of a button, each modular unit automatically dispenses precisely the amount of cleaning power necessary for spotless results. Overuse and waste are eliminated. Common dilution strengths and ready-to-use quantities appear in the chart.
