

# The **NEW** Ultra Active® Specialties system.

Ultra Active® Specialties takes “clean” to the next step with its exclusive NEW dispensing system. No other system combines ultra-concentrated products with safety and convenience to give you superior cleaning quality for pots, pans, silverware, glassware and dishes.

**SAFE.** Ultra Active® Specialties is a wall-mounted concentrate system that conserves space and eliminates the need for heavy buckets. Canisters are conveniently sized and light enough to change quickly and effortlessly. Totally enclosed dispensing prevents exposure to product while dispensing or changing canisters.

**INNOVATIVE.** The Ultra Active® canister and pump designs allow for complete product usage so nothing is wasted. See-through packaging makes it easy to see product levels, eliminating guesswork. Each product type has its own bold graphics where directions are clearly labeled. The new Ultra Active dispenser design utilizes lever action to dispense, making operation 50% easier.

**COST SAVING.** The Ultra Active® Specialties dispenser was specifically made to prevent overuse of product in two ways. First, a portion control feature adjusts to your individual needs—any amount from 0 to 1.5 ounces is easily calibrated. Second, a built-in delay mechanism eliminates employee waste—push once, and you get the right amount, every time.

**EARTH-FRIENDLY.** Because of the Ultra Active® Specialties innovative packaging design, less plastic is required and canisters need no disassembly. Canisters are 100% recyclable, too. System dispensers can be easily removed from their wall brackets for cleaning.

# Dispensing has never been easier.

- 1.** Color code system prevents wrong product choice
- 2.** Heavy duty dispenser for durability and reliability
- 3.** Lever operation makes dispensing easier
- 4.** “Easy Load” feature makes changing product easier and safer
- 5.** Adjustment is easy and accurate
- 6.** No-drip feature for hassle-free operation

**EASY LOAD**

<b>1</b>		Lift up paddle, remove old canister.
<b>2</b>		Place new canister in dispenser.
<b>3</b>		Move paddle down (canister is locked).
<b>4</b>		Press once to dispense.

“EASY LOAD” instructions on the dispensing paddle are easy to use. Just follow the steps to change the old canister and replace with the new. It's that easy!

EARTH-FRIENDLY.**

# Introducing Pan-Plus™: Get Tough on Grease.

Ultra Active® Pan-Plus™ uses a unique formula targeted directly at grease. Not just the easy stuff, but the grease left on pots and pans that requires more elbow grease to remove and many times more detergent. Pan-Plus™ puts extra power behind breaking up and penetrating baked-on grease so you scrub less, getting the job done more quickly and effectively. Best yet, it uses the NEW Ultra Active® dispenser for proper dosing and convenience.
