The new Freedom System granular products with polymer technology provide improved cleaning performance for sparkling results! Freedom System granular formulas offer high concentrations of active ingredients and less waste than solids. There is a concentrate formulated for virtually every soil type and water condition. The easy-to-install recyclable canisters are totally encapsulated, eliminating employee contact with the concentrate. Plus, with Freedom System, the dishwasher receives the correct amount of product for great results, every time. There's a Freedom System concentrate for every warewash challenge.
