PERSONAL HYGIENE SYSTEM

protecting you and the environment
in both hospitality and healthcare

The Personal Hygiene System (PHS) is a product-saving, labor-saving and earth-saving alternative to conventional bulk liquid and bag-in-the-box skincare systems. The innovative dispenser combines unique design with 100% recyclability. The range of soaps offered in the Personal Hygiene System are among the finest to have ever touched hands in both hospitality and healthcare environments.

DISPENSER FEATURES AND BENEFITS

- 1 The patented self-venting pump eliminates the need to puncture or vent the canister so product contamination is virtually eliminated.
- 2 The canister is 100% recyclable, unlike bag-in-the-box or other bladder-type systems.
- 3 See through plastic makes it easy to see product levels.
- 4 Product type and directions for use are clearly labeled.
- 5 The canister and pump designs allow for 100% product usage.
- 6 The patented self-venting pump delivers "positive break" from bottle to hand, virtually eliminating the chance for bacterial contamination.
- 7 The self-locking, keyless device deters vandals.
- 8 The dishwasher-safe dispensers are easily removed from their wall brackets for routine cleaning.
- 9 Requiring less than 5 pounds of pressure to operate, the pushbar complies with ADA requirements for operation by the elderly and physically challenged.

TWO DISPENSER OPTIONS:

WHITE WITH STANDARD STAINLESS STEEL PUSHBAR

This Personal Hygiene Dispenser is the perfect choice for hospitals, nursing homes, public restrooms and foodservice facilities.
SKU# 015114

BLACK WITH DURABLE PLASTIC PUSHBAR

Sleek with an upscale look. The black dispenser is a good choice for restaurants, schools, offices and hotels.
SKU# 014375

PERSONAL HYGIENE SYSTEM AQUA - A gentle ph-balanced formula for bath and shower, Personal Hygiene System Aqua is rich with skin and hair conditioning emollients for a luxurious bathing experience. A small, economical amount produces a rich, generous lather. Personal Hygiene System Aqua is perfect for use in health clubs, nursing homes and hospitals.

Pack size: 4/1500 mL (064691)

PERSONAL HYGIENE SYSTEM BLUE - An economical, quality lotion soap ideal for lighter soils and general washroom use. The rich, pearlized formula, fortified with emollients, will leave hands clean and smooth with a fresh, baby powder scent.

Pack size: 4/1500 mL (064684)

PERSONAL HYGIENE SYSTEM CLEAR - A hand sanitizer that's perfectly suited for environments where water washing is not immediately available. The fast acting alcohol base destroys 99.9% of common germs within 15 seconds while emollients replenish skin's moisture, allowing hands to remain soft and supple.

Pack size: 4/1500 mL (064704)

PERSONAL HYGIENE SYSTEM E2 - This quat-based cleanser/sanitizer cleans hands and kills 99.9% of common germs within 15 seconds. Personal Hygiene System E2 is approved for use in federally inspected meat, poultry and food processing plants. Contains no triclosan, dye or fragrance.

Pack size: 4/1500 mL (100902718)

PERSONAL HYGIENE SYSTEM PEACH - Personal Hygiene System Peach is an antimicrobial skin cleanser that contains 0.5% PCMX and is enriched with emollients to leave hands soft and smooth. It has the ability to kill germs and bacteria on contact while it's fresh lemon scent leaves hands smelling natural and clean.

Pack size: 8/1500 mL (064668)

PERSONAL HYGIENE SYSTEM WHITE - One of the industry's finest handsoaps, Personal Hygiene System White's highly concentrated formula handles the toughest soils (i.e. ink, adhesives, dirt, and grime). Formulated with an attractive floral scent and enriched with emollients, it will leave hands smelling fresh and exceptionally soft and smooth. It is the perfect choice when top of the line quality is desired.

Pack size: 8/1500 mL (064674)

WHY PHS?

ECONOMICAL

Not a drop of soap is ever wasted. The Personal Hygiene System dispenser is designed to empty completely, with a patented, self-venting, anti-drip pump system. Bag-in-the-box and bladder-type dispensers will invariably leave unused product in the dispenser; their bags and tubes do not empty completely. Bag-in-the-box dispensers have tiny viewing windows that often make it difficult to tell product levels are nearing empty. With the Personal Hygiene System, all the product left in the translucent plastic canister can be seen at a glance, so it's obvious when the canister needs replacement. Plus, the dispenser is calibrated for infinite settings (from 0 to 1.5 mL) to ensure the most appropriate and economical amount of soap is dispensed.

CONVENIENT

Canisters can be changed in seconds. It takes only seconds to remove an empty canister and replace it with a new one. In locations where product tampering and vandalism are concerns, simply press the hidden, keyless locking device to click-out and click-in canisters. Remove the locking device when vandalism is not a concern, and canisters push in and pull out with a gentle glide.

100% RECYCLABLE

No disassembly is required. Unlike bag-in-the-box systems, the canister cartridge needs no disassembly and is easily recyclable. Canisters can be deposited in municipal recycling bins according to local regulations.

PREVENTATIVE

Provides maximum germ protection without risk of contamination. The Personal Hygiene System helps your facility comply with the strictest hand-wash guidelines for the prevention of infections. The patented self-venting pump limits exposure to airborne particles and offers "positive break" (the dispenser ejects product clearly and fully without the risk of product contamination or backup). The Personal Hygiene System is among the most sanitary ways to dispense skincare products, even in the strictest medical settings.
