

SARS-CoV-2 (Novel Coronavirus) and COVID-19 Disease

Every day, scientists are discovering new information about the virus causing the COVID-19 pandemic. In March of 2020, the EPA announced the use of their Emerging Pathogens Guidelines for use of products that can be used against COVID-19. These products have proven their efficacy against pathogens that are similar to and/or harder to kill than SARs-CoV2, or directly kill SARs-CoV2. These products are listed on the EPA website under List N.

U S Chemical is working hard to maintain a steady supply of products that fall into this category. Use the product list on this guide to determine which product will work best for your needs.

Please seek medical attention if you are exhibiting any symptoms and follow all local, state and federal rules in place for the management of this virus.

Visit the CDC website for more information ([cdc.org](https://www.cdc.org)).
